

### GRP Batten Fix Valley Troughs For Tiles

CODE **GTB 14/24**

#### Description:

The GTB 14/24 is designed for use with tiles in a batten fix application and is supplied in either 3M (GTB 14) or 2.44M (GTB 24) lengths and is 400mm wide overall. The GRP valley can be used to provide a weatherproof junction at features such as change of direction, materials and offers an effective alternative to the use of lead, as it is easily cut to length and handle signally reducing the fitting times for the contractor on site and has no scrap resale value unlike lead.

The laminate of materials used in the manufacturing process ensures that the tile valleys are highly flexible and are able to suit roof pitches 17.5 to 60 degrees in new build and refurbishment situations and a recommended maximum difference between roof pitches of 20 degrees.

The durable gel coat and U.V. inhibitor gives further protection against weathering and discolouration due to this all products carry a minimum 30 year life expectancy.

While the standard strip provides an excellent mortar key from tile to valley trough.

COLOURS	Lead Grey
PACKING DETAILS	Packed in 10's
WEIGHT GTB 14	20.8kg per pack
WEIGHT GTB 24	18kg per pack
MATERIAL	Glass reinforced polyester laminate with a gel coat on the upper face and a U.V. inhibitor
MANUFACTURING PROCESS	Extrusion
BBA CERTIFICATE NUMBER	96/3289 Available on request 20 year insurance backed
